GLENN HAUSER'S SHORTWAVE/DX REPORT 99-45, Oct 15, 1999

{Items from this and all our reports may be reproduced and re-reproduced only providing full credit be maintained at all stages}

This brief report mainly serves to update some items in 99-44, to be sure everybody has received word.

** ALASKA [non]. One frequency has changed for the Oct 16 test of KNLS via St. Petersburg, Russia: 9480 instead of 11975 at 1400-1500 (Mikhail Timofehev)

** GREENLAND. The Nordx website now says that the planned SW DX special from here Oct 17 has been cancelled. Never mind (Hauser)

** PAKISTAN [non?]. Further checks at 1400 on 15170: Oct 14 after Spain closed around 1401, found music, and at 1410 definitely French, so probably not R. Pakistan (Hauser)

I'll take this opportunity to share with you material which normally appears only in REVIEW OF INTERNATIONAL BROADCASTING. The numbers in parentheses at the end refer to the issue containing more information about the item. This listing concentrates on programs of special interest on the dates and times concerned, not well-known programs at constant timings:

CALENDAR
========

[In the case of TV items, make allowances for local delays if west of the CDT and EDT zones; in prime time, MDT normally delays 1 hour, MST-Arizona 2 hours, PDT 3 hours. PBS timings vary widely from market to market so consult local listings to confirm; always check the latest version of Calendar, constantly corrected and updated]
